

COMPLIANCE · HIPAA + DATA SOVEREIGNTY

CMK encryption · TLS/HMAC · Tailscale segmentation · audit logging · row-level access · default-deny · local-first

ZONE 1 · INPUTS — disparate, unsorted (★ anchor = telephony · ◆ MVP/EA = email+transcript)

Zoom Phone ★
calls · recordings · SMS

Email — Outlook / Gmail ◆

Transcripts — Fireflies / Fathom ◆

Calendar

Documents · loose notes

ZONE 2 · GATED SORTING PIPELINE

FastAPI intake receiver

NATS — intake.raw

Workers
metadata · recording · transcript · parser

Ollama entity extraction
local 8B/14B + bge-m3 · cloud escalation

INGESTION GATES · DEFAULT-DENY (HIPAA boundary — stays local unless promoted)

per-task + dependency-layer gates

HUMAN gates
BAA · key ceremony · compliance · go/no-go

runtime data gates

promote vs stay-local

ZONE 3 · CANONICAL SUBSTRATE — local-first, the data you OWN

Postgres custody
append-only, immutable

Neo4j CE + Graphiti
knowledge graph

Postgres + pgvector
passage chunks · bge-m3

MiniIO — object store
recordings

OmniSync API

Substrate HOST ★
target: on-prem MSI+Hyper-V/Unifi
open (6/24): Hetzner today · Azure · hybrid

△ BUSINESS SYSTEMS & OVERLAYS — 6/24 call · placement vs substrate TBD (confirm)

△ ERPNext · Rethink · QuickBooks
business system-of-record

△ Metabase BI — TIC/Cacheware C++ pipeline (AWS)
separate existing analytics · ERPNext Insights candidate

△ JumpCloud — SSO / identity (business case pending)

△ Plane — team PM surface (reconcile vs Notion/AppFlowy)

△ DevSecOps / SRE owner — TO HIRE

ZONE 4 · PROJECTION SURFACES — derived, staged, never source of truth

Obsidian vault
current EA context projection

Stage 1 · Notion orchestrator — CURRENT

Stage 3 · AppFlowy (control) + Affine (content) — TARGET

Notion → sanitized edge (egress)

CONTROL PLANE — REASON → ORCHESTRATE → EXECUTE (separate at every stage)

READINESS HEAT-MAP · hexagon = gate · red hex = HUMAN gate · diamond = open decision · △ = call overlay (confirm)

In place / running

In progress

Planned / target

Gap / at risk

Open decision

△ overlay — from 6/24 call, not in OmniSync docs
